### Specific notes:

1. **4 line display** and **MODE** button on the car stereo is required for **Gateway Pro**

2. JBL system is not supported

3. On certain Citroen systems (C4 and C4 Picasso mostly) the factory phone menu cannot be selected, even if the function is programmed using a factory programmer tool like Diagbox or Lexia 3. After thorough testing we found that this is due to a hardware limitation on the car side however there is no factual car option/setting to identify the vehicles where this would occur. With these vehicles the phone functions can only be accessed (initiating calls, terminating calls, phonebook browsing, etc.) from the phone interface (buttons or touch screen) however the handsfree is functional even with these systems.

### Specific notes:

1. Head units made by Technisat are supported only if Media option is coded separately from 2010
2. The car must have MFA High line cluster (FIS) for GW17/33VC1 installation
3. The car must have Tuner RDS capable cluster (FIS) for GW17/33AC1 installation
4. Media Player 3 (2E) has to be coded before or after the GW17/33V21 installation from 2011
5. Media Player 3 (2E) and Telephone (77) options have to be coded before or after the GWF1V21 installation from 2011
6. MFA High Line cluster is required for having a phone menu option on RCD 310 and RNS 310 with Gateway Pro

### Specific notes:

- Media player 3 (2E) option has to be coded before or after the GW17/33V21 installation
- Media Player 3 (2E) and Telephone (77) options have to be coded before or after the GWP1V21 installation. In case of Bolero and Columbus Head Units the phone coding is not necessary because phone information also visible on the car Radio. In order to see phone info on the cluster (FIS) 77 has to be coded
- Steering wheel controls and Maxi DOT (also known as MFA High Line) cluster is required for Gateway Pro installation, because otherwise the phone functions cannot be reached
